### PARTNERS

Greater Portland Council of Governments and The Island Institute

### PROJECT DESCRIPTION (anticipated completion April 2017)

Chebeague Island is an unbridged island that relies on the municipally-owned Stone Pier as its primary ferry landing, and waterfront access point for local commercial fishermen, residents, visitors and recreational boaters. The economy of the island is reliant on the public pier to support local commerce and tourism. Built in the 19th century, the Stone Pier is experiencing increasingly severe impacts from coastal storms. The town will use these funds to determine the most cost-effective route forward - to move to an alternate landing site or to rebuild and expand the current facility at the Stone Pier.
