

## Unit 5 Section 2 Lesson 1: DDT - Doing Deadly Things

Handout 4

### Citizen Scientist: Going, Going, Almost Gone Questions to Explore

- Where is your species found, and in what type of habitat does it live?
- What does your species eat, and what eats it?
- In what ways is your species adapted to living in its environment?
- What size territory does your species require?
- Does your species migrate? If so, what habitats are necessary for a successful migration?
- What are the major reasons that your species is threatened or endangered?

## Unit 5 Section 2 Lesson 1: DDT - Doing Deadly Things

Handout 4

### Citizen Scientist: Going, Going, Almost Gone Questions to Explore

- Is the species threatened by chemical pollution, such as the use of DDT?
- What is the current population of your species? How has its population changed over time?
- Are there controversies surrounding the protection of your species and its habitat? If so, what are the concerns, and how have these concerns been resolved?
- What are people doing to protect your species? How successful are the plans? Do any laws help to protect your species?
- Is your species endangered or threatened?
