

# FIFRA Section 24(c) Special Local Need Label

Corteva Agriscience, LLC, 9330 Zionsville Road, Indianapolis, IN 46268-1054 USA

**Milestone<sup>®</sup>**

EPA Reg. No. 62719-519

FIFRA Section 24(c) Special Local Need Registration

EPA SLN ME-210001

**This SLN expires and must not be used or distributed after December 31, 2022.  
For Distribution and Use Only Within the State of Maine**

**For Control Of Herbaceous Broadleaf Weeds And Woody Plants  
in Conifer Forest Site Preparation Sites**

## Directions for Use

### ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This Special Local Need (SLN) labeling and the federal label for this product must be in the possession of the user at the time of pesticide application.
- Read this SLN labeling and the label affixed to the container for Milestone before applying.
- Follow all applicable use directions, precautions, restrictions, and statements pertaining to the Worker Protection Standard on this SLN labeling and the label affixed to the product container.

Refer to product label for Use Precautions, Restrictions, Worker Protection Standards, Mixing Instructions, and Application Methods.

## Conifer Forest Site Preparation Areas

Milestone may be applied to conifer forests areas as an aerial or ground broadcast application, as a spot application, or as a high-volume foliar application to control herbaceous broadleaf weeds and woody plants. Avoid spray containing Milestone coming in contact with foliage of desirable tree species.

Milestone may be applied alone or in tank-mix combinations with labeled rates of other herbicides provided: (1) the tank mix product is labeled for the timing and method of application for the use site to be treated, and (2) mixing is not prohibited by the label of the registered tank mixed products. Use as directed in the Directions for Use section of the tank-mix partner.

## Forest Management Applications

Use up to 7 fl oz of Milestone per acre. Use a non-ionic agricultural surfactant for all foliar applications. Tank mixtures with other herbicides registered for forest use may be necessary to control woody brush if brush is not susceptible to Milestone. When tank mixtures of herbicides are used for forest site preparation, labels for all products in the mixture must be followed and the longest recommended waiting period before planting observed.

For best control from broadcast and directed spray applications of Milestone, use a spray volume that will provide thorough plant coverage. Recommended spray volumes are usually 10 to 25 gallons per acre by air or 10 to 100 gallons per acre by ground. To improve spray coverage of spray volumes less than 50 gallons per acre, add an agriculturally labeled non-ionic surfactant at the recommended rate specified on the surfactant label.
