I have determined that the patient:

- ☐ is at least 18 years of age;
- ☐ is suffering with a terminal disease;
- ☐ is competent; and
- ☐ has made a voluntary request for medication to self-administer for the purpose of ending the patient's life in a humane and dignified manner.

I have requested that the patient:

- ☐ demonstrate he/she is a Maine state resident, and I am satisfied the patient is a Maine state resident.

To ensure the patient is making an informed decision, I have informed the patient of the following:

- ☐ the patient's medical diagnosis;
- ☐ the patient's prognosis;
- ☐ the potential risks associated with taking the medication to be prescribed;
- ☐ the probable result of taking the medication to be prescribed; and
- ☐ the feasible alternatives to taking the medication to be prescribed, including palliative care and comfort care, hospice care, pain control and disease-directed treatment options.

I have taken the additional following steps:

- ☐ Referred the patient to a consulting physician for medical confirmation of the diagnosis and for a determination that the patient is competent and acting voluntarily;
- ☐ Confirmed that the patient's request does not arise from coercion or undue influence by another individual by discussing with the patient, outside the presence of any other individual, except for an interpreter, whether the patient is making an informed decision;
- ☐ Verified that the patient, based on my evaluation or following a referral for counseling, is not suffering from a psychiatric or psychological disorder or depression causing impaired judgement;
- ☐ Recommended that the patient notify the patient's next of kin;
- ☐ Counseled the patient about the importance of having another person present when the patient takes the medication prescribed, and counseled the patient about not taking the medication prescribed in a public place;
- ☐ Informed the patient that the patient has the opportunity to rescind the request at any time and in any manner; and
- ☐ Verified immediately before writing a prescription for life-ending medication that the patient is making an informed decision.
